

JOORY HANI HALABI

Full Stack Software Engineer

Makkah, Saudi Arabia (Open to Relocation) | Joory6067@hotmail.com | +966 56 249 5829 | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Recent Software Engineering graduate (GPA 3.7/4.0, Second Honors) with hands-on full-stack development experience gained through an internship at King Abdulaziz Hospital, building 20+ modules across enterprise healthcare systems. Skilled in Node.js, Express.js, FastAPI, REST API design, and relational/cloud databases. Combines technical delivery with proven leadership through active roles in university tech communities. Seeking to join a graduate development or training-to-employment program to grow as a Full Stack Software Engineer.

EDUCATION

Bachelor of Software Engineering

2026

Umm Al-Qura University — GPA: 3.7/4.0 (Second Honors)

EXPERIENCE

Software Engineering Intern

Jul 2025 – Nov 2025

King Abdulaziz Hospital

- Enhanced 4 healthcare systems by delivering new features and resolving critical production issues.
- Built 20+ full-stack modules across multiple systems, including authentication, patients, employees, admin, reports, and tickets.
- Developed 4 operational dashboards and 5+ reporting modules used by hospital operations and support teams.

TECHNICAL SKILLS

Backend & APIs: Node.js, Express.js, FastAPI, REST APIs, JWT Authentication, RBAC

Languages: Python, JavaScript, HTML, CSS

Databases & Cloud: MySQL, PostgreSQL, Supabase (Cloud)

Mobile & Data visualization: React Native, Chart.js

Tools & Platforms: Git, GitHub, Figma, VS Code

PROJECTS

Enterprise Healthcare Systems — King Abdulaziz Hospital (Internship)

- Hospital Information System:** RESTful APIs for authentication, patients, employees, and admin management with secure session handling (Node.js, Express.js).
- Hospital Technical Support & Maintenance System:** Ticketing, misuse-reporting, and Excel bulk-import modules; implemented RBAC and fixed critical backend/database issues.
- Call Center Management System:** Frontend and backend features for call center operations; integrated REST APIs and optimized MySQL queries.
- Aounak – Complaint & Feedback Management System:** Enhanced RBAC authentication, reporting dashboards (Chart.js), notifications, and Arabic/English multilingual support.

Personal Project

- Tnabbah – AI-Powered Vehicle Diagnostics Platform:** Collaborated in a 5-person team on a React Native/Supabase OBD-II diagnostics app; built the backend and designed 2 Supabase database tables, implemented real-time data retrieval (under 5 seconds) supporting 114 diagnostic trouble codes, integrated the team's AI-powered maintenance assistant, and developed the frontend for the diagnostics report screen.

CERTIFICATIONS

Artificial Intelligence Specialization — KAUST Academy

2025

Data Fundamentals — IBM SkillsBuild

2024

Introduction to Data Science in Python — University of Michigan

2024

Elements of AI — University of Helsinki

2022

LEADERSHIP & VOLUNTEERING

- Head of Human Resources — Keptar Tech Community, Awontech** (Dec 2024 – Sep 2025): Coordinated volunteers and supported event planning across teams.
- Head of Member Affairs Committee — UQU Computing Club** (Jan 2026 – Jun 2026): Led member engagement initiatives and coordinated cross-committee technical events.
- Project Management Committee Member — UQU Computing Club** (Dec 2024 – Jul 2025): Contributed to managing student-led tech projects and learning initiatives.
